Notes: Exit FY denotes the year in which the project leaves the World Bank's active portfolio, normally at the end of disbursements. Percents exclude projects not rated. In July 2000, the rating scale for sustainability was changed from a 3-point scale (Likely, Uncertain, Unlikely) to a 4-point scale (Highly Likely, Likely, Unlikely, Highly Unlikely), with the new scale used in rating projects exited between FY00-02. To monitor the effects of this change, OED continued using the old 3-point scale in parallel with the new till May 2003.

\* The data for FY04 exits represent a partial lending sample (177 out of 320) and reflects all OED project evaluations through February 15, 2005.
