Notes: Exit FY denotes the year in which the project leaves the World Bank's active portfolio, normally at the end of disbursements. Percentages exclude projects not rated. Sector designations are taken from the World Bank's Common Data Stores as of end FY01. Income groups designations are taken from the World Development Indicators 2001. Active Portfolio data reflects projects active as of July 1, 2001, and is provided by the Quality Assurance Group (QAG). For details on QAG's "Projects at Risk" indicator please refer to the FY01 Annual Review on Portfolio Performance. ¹ See endnote number 14 of the ARDE Report for differences between the old and the current sustainability scale.

* The data for FY01 exits represents a partial IBRD/IDA lending sample (131 out of 275) and reflects all OED project evaluations through October 15, 2001. The processing of the remainder of the FY01 exits is ongoing, expected to be completed by spring 2002.

Table 2: Outcome, sustainability, institutional development (ID) impact and aggregate by various dimensions, weighted by disbursements, FY96-99 and FY00-01* exits; Disbursements at Risk, similarly disaggregated, for the active portfolio.

Lower	193	49	21	20
<i>Overall</i>	394	100	21	20

Note: ERR is the economic rate of return at appraisal, and RERR is the revised economic rate of return at evaluation. OED reporting of rates of return includes only investment projects with both ERRs and RERRs and excludes those in the following sectors that do not traditionally calculate rates of return: education, finance, multisector, population, health & nutrition, public sector management, and social protection. Additionally, agricultural credit, research and extension were also excluded. Of the remaining investment projects those for which ERR/RERRs cover less than 20 percent of project costs are also excluded. The actual numbers being excluded are small. For example, social protection had three projects over the FY 1996-01 exit years with an ERR and RERR; public sector management had two and education had none.

Note: Exit FY denotes the year in which the project leaves the World Bank's active portfolio, normally at the end of disbursements. Percentages exclude projects not rated.

* The data for FY01 exits represents a partial IBRD/IDA lending sample (131 out of 275) and reflects all OED project evaluations through October 15, 2001. The processing of the remainder of the FY01 sample is ongoing, expected to be completed by spring 2002. Disbursements amounts are expressed in FY96 US\$.

Notes: Exit FY denotes the year in which the project leaves the World Bank's active portfolio, normally at the end of disbursements. Percentages exclude projects not rated.

Table 14: Operations evaluated for ARDE 2001

* The table includes all operations evaluated since the 2001 ARDE, covering the period September 31, 2001 thru October 15, 2001.

Note: An ES is an evaluative summary, a PPAR is a project performance audit report.

Both commitments and cancellation amounts are in nominal terms.

For a discussion of Outcome, Sustainability and Institutional Development Impact ratings please refer to chapter 3 of the ARDE 2001 Report

Outcome is rated on a 6 pt. Scale:

Highly Satisfactory (HSAT), Satisfactory (SAT), Moderately Satisfactory (MSAT), Moderately Unsatisfactory (MUNSAT), Unsatisfactory (UNSAT), and Highly Unsatisfactory (HUNSAT).

Sustainability (Sust.) is rated on a 4-pt. Scale: Highly Likely (HLIK), Likely (LIK), Highly Unlikely (HUNLIK), and Unlikely (UNLIK).

Institutional Development impact is rated on a 3-pt. Scale: Substantial (SUB), Modest (MOD), and Negligible (NEG).
