Notes: * The data for FY03 exits represents a partial IBRD/IDA lending sample (130 out of 293) and reflect all OED project evaluations through December 31, 2003. The processing of the remainder of the FY03 exits is ongoing, expected to be completed by end FY04. Percentages exclude projects not rated. In July 2000, the rating scale for the sustainability criterion was changed from a 3-point scale (Likely, Uncertain, Unlikely) to a 4-point scale (Highly likely, Likely, Unlikely, Highly unlikely), with the new scale used in rating projects that exited between FY00-02. To monitor the effects of this change, OED continued using the old 3-point scale in parallel with the new scale until May 2003.

In July 2000, the rating scale for the sustainability criterion was changed from a 3-point scale (Likely, Uncertain, Unlikely) to a 4-point scale (Highly likely, Likely, Unlikely, Highly unlikely), with the new scale used in rating projects that exited between FY00-02. To monitor the effects of this change, OED continued using the old 3-point scale in parallel with the new scale until May 2003.

Notes: * The data for FY03 exits represents a partial IBRD/IDA lending sample (130 out of 293) and reflect all OED project evaluations through December 31, 2003. The processing of the remainder of the FY03 exits is ongoing, expected to be completed by end FY04. Percentages exclude projects not rated. In July 2000, the rating scale for the sustainability criterion was changed from a 3-point scale (Likely, Uncertain, Unlikely) to a 4-point scale (Highly likely, Likely, Unlikely, Highly unlikely), with the new scale used in rating projects that exited between FY00-02. To monitor the effects of this change, OED continued using the old 3-point scale in parallel with the new scale until May 2003.
